

The Help Button That Works Everywhere

Emergency Response USA's Mobile Monitoring Solution is an emergency help button that can be used virtually anywhere – **at home or away.**

So, whenever there's an accident, a fall, sudden illness or you just need assistance– help is just a button-push away. **No matter where you are.**

- In the home
- While driving
- At the grocery store
- On vacation
- At family's homes
- Anywhere, any time of day

*For proper operation, MMS requires adequate cellular coverage. Poor cellular coverage may result in the inability to place a call, automatically detect a fall, and/or properly locate you automatically during an emergency. Check with your response team for known coverage limitations. MMS is not a replacement for regular contact with caregivers or access to an alternative means of placing an emergency call. As with all location-based services, it may not always be possible to determine your location. Multi-level buildings, parking garages, and even dense urban areas can make it difficult for satellites and cell phone towers to locate your exact location. In an emergency, please provide your response team with as much information as possible about your location.

How It Works

1

Wear it anywhere

Small, easy-to-wear help button.

2

Push button for help

It detects your location automatically.

3

We'll talk to you.

Speak "hands-free" with our 24/7 monitoring center.

4

Help is on the way

We'll notify emergency responders, family or neighbors.

Why You Need It

Better than a cell phone. Every second counts in a critical emergency. We can send help faster and detect falls automatically.

Freedom. Older adults can maintain their independence and active lifestyles. The help button travels anywhere you do.

Peace of mind. You and your loved ones can rest easy knowing help is available, 24 hours a day.

We'll have your information ready. Operators will immediately know who you are, where you are and who to send to help.

FDA registered. It's the first Mobile Medical Alert System to comply with FDA requirements.
