

Our Cellular Safety Monitoring System connects via the cellular telephone network.

Studies show that many people are giving up their landline phone service in favor of cell phones. In a 2007 filing by AT&T to the FCC, the telecommunications giant stated that, "Approximately 25% of all households have abandoned plain old telephone service." While traditional Personal Emergency Response Systems (PERS) require the home to have a landline-based phone service, our new cell-based system is designed to give you the benefits of a traditional Safety Monitoring System without the need and additional cost of a dedicated landline. Our Cell-Based Safety Monitoring System functions essentially the same as our standard system except that no landline phone is required at the home. It is a totally independent device and does not require an additional cell plan, nor interfere with your existing cell phone service. The system features a waterproof personal help button and the base unit with back-up battery.

Just push the help button on the unit or on your pendant and you are in immediate communication with one of our efficient, courteous, and highly trained operators who already know who they should contact on your behalf.

EMERGENCY RESPONSE USA

Order Today! 855.237.2500

www.emergencyresponseusa.com

Emergency Response USA allows anyone to send for help with the push of a button. It's a 24-hour home safety solution for:

The Equipment

Our Cellular Safety Monitoring System is state-of-the-art, yet easy to use. With its big "Emergency Call" button and Portable wireless help button, a single press of the button is all it takes to summon immediate assistance in an emergency.

Base Unit Power Supply and Battery Backup

Powered by a low voltage plug-in transformer, the base unit has rechargeable battery that continually charges to provide up to 36 hours of standby power in the event of a power failure.

Wireless Pendant

Our wireless pendant is durable, lightweight, and comfortable to wear. It can be worn in two convenient ways, either around your neck as a pendant or wrist band. Since it's water-resistant, you can keep it on in the shower (where far too many home accidents occur). In case of an emergency you simply press the button on the pendant or the base station and you will be connected to our 24/7 monitoring center.

How it works

Push button for help

When Help is needed and you can't call 9-1-1.

We'll talk to you

Speak "hands-free" with our 24/7 monitoring center.

Help is on the way

We'll notify emergency responders, family or neighbors.

*Peace of Mind with
the Press of a Button*
